COURSE #	SLO		FA 2015	Spr 2016	FA 2016	Spr 2017	FA 2017	Spr 2018	FA 2018
ANTH 120	1	Generate ethnographic examples that illustrate the concept of culture and demonstrate how cultures function as an integrated and dynamic system.							
		Apply anthropological methods such as participant observation and a cross-cultural perspective in evaluating familiar and unfamiliar cultural practices and beliefs. Apply anthropology's holistic perspective and bio-cultural approach to diverse human phenomena.							
ANTH 125		Students will apply a cross-cultural perspective in evaluating familiar and unfamiliar cultural practices, rituals, and beliefs in the specific culture studied by the course.							
ANTH 130		Employ the synthetic theory of evolution to summarize the major trends and issues in primate and human evolutionary 1 history.				x			
		Explain modern human biological diversity from an evolutionary perspective, including evaluating the biological significance of the "race" concept.				x			
	3	Apply anthropology's holistic perspective and bio-cultural approach to diverse human biological and social phenomena.				х			
ANTH 131	1	Employing a comparative perspective, analyze cranial and dental features of various species of living primates, fossil hominids and modern humans		ASP					
	2	Make anthropological laboratory and field observations and measurements in accordance with established scientific protocol.		ASP					
ANTH 140	2	Summarize the major goals and theoretical approaches of archaeology, and explain archaeology's role as a subfield of anthropology.						X	

COURSE #	SLO		FA 2015	Spr 2016	FA 2016	Spr 2017	FA 2017	Spr 2018	FA 2018
		Given a particular research question, identify and select							
		appropriate archaeological techniques and methods that best							
	2	2 address the research problem.						x	
		Explain how environmental, demographic and social forces							
	3	B have shaped major developments in human history.						x	
		Complete individual study, research, or projects in							
ANTH 199		l anthropology.							
		Work independently (including self-monitoring, time							
	2	2 management, and resource acquisition).							
		Apply anthropological theories and scientific research							
	3	methodology to a selected topic.							
ANTH 215	,	**CROSS-LISTED WITH PSY215**	ASP, AAR					+	1
7.1111 213		Choose Listed Williams	7.51 , 70						
		Complete individual study, research, or projects in							
ANTH 298		Lanthropology.							
AIVIII 230	-	Work independently (including self-monitoring, time						+	
	-	2 management, and resource acquisition).							
	-	Apply anthropological theories and scientific research							
	3	methodology to a selected topic.							
		Complete individual study, research, or projects in						+	
ANTH 299A		Lanthropology.							
7.1111 23371		Work independently (including self-monitoring, time							
		2 management, and resource acquisition).							
		Apply anthropological theories and scientific research							
] 3	methodology to a selected topic.							
	 	-0,							
		Complete individual study, research, or projects in	 					+	
ANTH 299B		Lanthropology.							
	 	Work independently (including self-monitoring, time						+	
		2 management, and resource acquisition).							
	<u> </u>	Apply anthropological theories and scientific research						+	
		methodology to a selected topic.							
	<u> </u>							+
